STANDARD PACK SIZE	25kg
ALSO AVAILABLE IN	10kg

	Soft water	Hard water
Low dose	10g	15g
Medium dose	15g	20g
High dose	20g	25g

Dosage per 1kg of dry weight laundry

Great value biological laundry powder

Effective enzyme action on food, blood, body, tea & coffee stains.

Industrial quality results for the high street or institutional launderer.

Exceptionally good value for money on all soiling types.

Tailored formula for use with on-premise laundry and hand washing - performs well on shirts & domestic linen.

Fresh floral fragrance, phosphate free and suitable for hot, warm & low temperature washing.

How to use

See dosing table opposite.

1. In the washing machine
Apply 10-25g per 1kg of dry weight laundry, depending on level of soiling.
2. As a soaking agent
Dissolve 250g/10L warm water. Immerse linen/garments & leave to soak for up to 12 hours before hand/machine washing and rinsing with clean water.

Never soak wool, leather, silk, garments with metal fasteners or those with flame resistant finishes. Always follow garment washing instructions and check for colourfastness before use. Ensure that process has an adequate rinse to avoid detergent retention.
For further process information speak to an Ideal technical representative.

Health & safety

Available on request. Store in cool & dry conditions. Avoid exposure to direct sunlight. Use rubber gloves for hand washing.
