Great value non biological laundry powder

- ✓ Quality non biological blend of alkalis & detergents.
- ✓ Industrial quality results for the high street or institutional launderer.
- ✓ Exceptionally good value for money on all soiling types.
- ✓ Tailored formula for use with on-premise laundry and hand washing - performs well on shirts & domestic linen.
- ✓ Fresh floral fragrance, phosphate free and suitable for hot, warm & low temperature washing.

		Soft water	Hard water
Light Soiling		10g	15g
Medium Soiling		15g	20g
Heavy Soiling		20g	25g

Dosage per 1kg of dry weight laundry

How to use

See dosing table opposite.

1. In the washing machine

Apply 10-25g per 1kg of dry weight laundry, depending on level of soiling.

2. As a soaking agent

Dissolve 250g/10ltrs warm water. Immerse linen/garments & leave to soak for up to 12 hours before hand/machine washing and rinsing with clean water.

Never soak wool, leather, silk, garments with metal fasteners or those with flame resistant finishes. Always follow garment washing instructions and check for colourfastness before use. Ensure that process has an adequate rinse to avoid detergent retention.

For further process information speak to an Ideal technical representative.

Health & safety

Available on request. Store in cool & dry conditions. Avoid exposure to direct sunlight. Use rubber gloves for hand washing.
