SPECIFIC GRAVITY	0.925 – 0.945 at 20°C
STORAGE	above 5°C
STANDARD PACK SIZE	5L
ALSO AVAILABLE IN	10ml roll-on applicator, 250ml, 20L

Superior professional stain spotter for treating a wide range of problem stains

Developed in consultation with professional cleaners for tackling tough oily stains.

Treat spots of oil, paint, tar, adhesives, nail varnish and crayon.

Remove wax, lacquers and natural or synthetic resins.

Ready to use straight from the bottle.

Available as 10ml mini roll-on or 250ml applicator bottles. Refills available in 5L drums.

How to use

Refer to Ideal Spotter Chart.

Apply spotter directly to stain. Allow time to penetrate. Gently work stain with a spotting bone, brush or Ideal roll-on applicator. Flush area with water or steam. Clean treated garments as normal. Dyestuffs can often display poor fastness to spotting, so we recommend that seam tests are always carried out before application. It's always better to clean as soon as possible after application. You should only pre spot garments in time for the next load. All spotters are suitable for use in dry cleaning and wet cleaning but always ensure that green spot is flushed prior to wet cleaning.

For further process information speak to an Ideal technical representative.

Health & safety

Available on request. Store above 5°C.
