ashore spotbuster

A spray on prespotter for water based stains. Always leave to dry completely prior to cleaning.

ashore

Have you tried the rest of the ashore range: prespotters, detergents and finishing agents. Made in the UK.

* All spotters are suitable for use in dry cleaning and wet cleaning but always ensure that green spot is flushed prior to wet cleaning.

Take a look at the Ideal periodic table of laundry, featuring every chemical element for professional laundry and textile care.

We are specialists in commercial laundry chemicals, and we think our comprehensive range is impossible to beat.

We are specialists in commercial laundry chemicals, and we think our comprehensive range is impossible to beat.

A family-run, British, independent company based in beautiful Northamptonshire. We've been formulating and manufacturing innovative, bespoke chemical solutions for the professional laundry industry since 1980. Our products include laundry liquids, powders, emulsifiers, starches, boosters, bleaches, dry cleaning detergents, wet cleaning chemicals, spotters and carpet care products.

some facts about dry cleaning & spotter chemicals....

Ideal has formulated a complete spectrum of spotters to tackle a diverse range of modern problem stains.

Other stains require specialist treatment to remove them, in the form of spotting chemicals.

Dry cleaning solvents dissolve and remove grease and oil stains. Water by itself can't do this.

The dry cleaning process doesn't wet the fibres, and these problems are less likely to occur.

When conventionally washed in water, natural fibres (such as wool and silk) can shrink, distort and lose colour.

It's called dry cleaning because the process contains little or no water.

Dry cleaning is the use of organic solvents to remove soil and stains from fabrics.

Best practice when using spotters

Dyestuffs can often display poor fastness to chemical spotting, so we recommend that seam tests are always carried out before application.

It's always better to dry-clean as soon as possible after application.

You should only pre-spot garments in time for the next load.

Ready to use straight from the bottle

Just apply Ideal spotters directly to the stain, work with a bone or brush and dry clean as normal.

Individual Ideal spotter chemicals are available in convenient 250ml applicator bottles. Refills are available in 5 litre drums.

"The new Ideal spotters are great! I'm really happy with them."

Pauline, Dry Cleaning Manager,
AAA Linen Services

"Ideal have created all the products I need to tackle even the toughest stains..."

Kostas Papadopoulos, Dry Cleaning
Expert, Athens
