

WASH YOUR PROBLEM

GRIMY COLLARS & CUFFS

1-ITEM AFFECTED

Cotton shirts

Waiter shirts | Staff shirts | Boarding school shirts

2-CAUSE

Body soils from normal daily wear.
Repeated wear leads to excessive build up of body oils.

3-SOLUTION

Brushing shortens collar life.
Use a liquid or powder detergent that emulsify and suspend soils.
Wash heavy soils at $>50^{\circ}\text{C}$.
Use an emulsifier and a good *built* detergent containing an oxygen release product for neutralising residual stains.
