SPECIFIC GRAVITY	1.050 – 1.070 at 20°C
STORAGE	above 5°C
STANDARD PACK SIZE	5L
ALSO AVAILABLE IN	10ml roll-on applicator, 250ml, 20L

Professional spotter for removal of iron or rust stains

Developed in consultation with professional cleaners & launderers for direct treatment of existing rust stains on fabric or garments.

For instant de-colourisation and removal of brown rust marks.

Works where washing or bleaching will always fail.

Ready to use straight from the bottle.

Available as 10ml mini roll-on or 250ml applicator bottles. Refills available in 5L drums.

How to use

Refer to Ideal Spotter Chart.

Apply rust remover directly to stain. Allow time to penetrate. Gently work stain with a spotting bone, with a brush or Ideal roll-on applicator. Flush area with water or steam. Clean treated garments as normal.

Dyestuffs can often display poor fastness to spotting, so we recommend that seam tests are always carried out before application. It's always better to clean as soon as possible after application. You should only pre spot garments in time for the next load.

For further process information speak to an Ideal technical representative.

Health & safety

Available on request. Store above 5°C.
